Week 8	∅	5ml		FLUSH			

Bloom Foliar 4-5 grams per gallon days 1, 7, 14, or bloom

Extend Week 6 here for longer Bloom times

Optimal rates will depend on plant variety, growing system and environment. Adjust ratios if you are not reaching desired EC values shown.

Always follow plant response, if you see tip burn increase your feeding volume by 20-30% throughout the day, for 2-3 days and/or decrease each input by .3g per gallon.
